

2nd Lille-Reading Workshop on International Finance

“Tensions within Globalisation”

17-18 November 2022, University of Lille (online)

or, for short, 2nd Lille-Reading WInFi

jointly organised by

Lille Economie Management (LEM-CNRS) – University of Lille (France),
the Group for Economic Analysis Research (GEAR) – University of Reading (UK),
the Money Macro and Finance (MMF) Society (UK)

and the European Research Group (GdRE) in *Money, Banking and Finance* (France/EU)

Subject

There have been large disruptions or, at least, changing trends in global trade and finance, due to various kinds of shocks, such as transnational terrorism, populism, the COVID-19 pandemic, natural disasters, and Russia’s invasion of Ukraine. The disruptions are multifaceted: surge in transportation costs, increase in global protectionism, bottlenecks in global supply chains, restrictions on trade and investment caused by economic sanctions and counter-sanctions, large swings in commodity prices, massive flows of refugees, new national FDI screening regimes, heightened capital flow volatility, growing global imbalances, sharp fluctuations in foreign exchange markets, resurgence of FX interventions, rebound in currency manipulation... What are the consequences of such developments? What are the prospects for global trade and finance? What are the policy challenges? What are the implications for fiscal, monetary, trade, financial, environmental or migration policies?

Topics could cover issues such as:

- A new (post-pandemic, post-war) era for globalisation?
- Economies’ vulnerability to commodity shocks
- Central bank reserves management in time of tensions
- Exchange-rate evolution in turbulent periods
- Climate change, natural disasters, and economic policies
- Global lending conditions in challenging times
- New trends in official financial flows
- Disasters and migration flows
- Effects of economic sanctions
- Fiscal policy responses to crises
